Dear Customer:

Camillus proudly presents the second edition of the Safari Series. There are five knives in the series, and each knife features a different animal of the prestigious African Big 5.

For this year only, our craftsmen have selected rare Bubinga wood. A sub-tropical hardwood species, Bubinga wood can be found on the continents of Africa and South America. Few cutlery companies have retained the skills necessary to work with exotic hardwoods...Camillus is one of those few.

The cartridge shield features the 300 Winchester Mag - argued by many to be the most effective caliber used on leopard safaries.
